

Public Trust Controls Pack

Complaints • Oversight • Escalation Pathways for AI-Enabled Public Services

Version: v1.0 • Date: January 2026

Purpose

Public trust is an operational requirement for AI-enabled public services. This Pack provides practical controls for complaints, oversight, escalation, and remedies.

Minimum Public Trust Controls

- **Notice & transparency:** citizens must know AI is used and what it does.
- **Accessible reporting:** multi-channel complaint routes (hotline/WhatsApp/email/in-person).
- **Human review:** contestability and override for high-impact outcomes.
- **Escalation:** tiered incident response with clear owners and timelines.
- **Oversight:** audit trails, review cycles, and corrective actions.

Tiered Incident Response (Lite)

Tier	Examples	Response Standard
Tier 1 (Minor)	Service disruption; minor errors	Acknowledge ≤72h; resolve ≤14d
Tier 2 (Significant)	Service denial/delay; discrimination patterns	Acknowledge ≤48h; investigate ≤7d; resolve ≤
Tier 3 (Critical)	Children harmed; data breach; uncontrolled actions	Acknowledge ≤24h; corrective action ≤72h; ful

Complaint Intake Template (Lite)

- Complaint ID • Date/Time • Service/System • Issue summary • Children involved (Y/N) • Severity tier • Action taken • Escalated to • Resolution

Oversight Review Cycle

- Monthly review during pilot; quarterly review after deployment; annual summary for leadership assurance.
